(360) 521-7667 | dannylpov@gmail.com | [linkedin.com/in/dang-le-46aa01122](https://www.linkedin.com/in/dang-le-46aa01122)

Professional Summary

Android Engineer with 8 years of experience building scalable Android and React Native applications. Expertise in Kotlin, Android Jetpack, REST APIs, offline-first architecture, and modern Android architecture. Proven track record of owning production Android applications, improving reliability, and delivering mobile solutions serving hundreds of thousands of users.

Technical Skills

- Languages: Kotlin, Java, JavaScript, TypeScript
- Frameworks & Libraries: Android SDK, Android Jetpack, Material Design, Retrofit, Room, Coroutines, Hilt/Dagger, React Native, WebView
- Architecture: MVVM, Clean Architecture, Dependency Injection, Offline-First Architecture
- Tools: Android Studio, Gradle, Git, Firebase, Crashlytics, Google Play Console

Professional Experience

Android Engineer

Transaction Network Services – Remote (Seattle, WA) | June 2021 – Present

- Owned Android development for USCC Call Guardian (500K+ users) and Xfinity Call Guard (200K+ users), leading feature development, production support, and Google Play releases.
- Partnered with product, design, QA, and backend teams to estimate work, evaluate implementation approaches, and deliver production features.
- Eliminated sync-related crashes, maintaining a 99.82% Crashlytics crash-free rate.
- Developed Google account synchronization, neighborhood-based spam detection, FCM caller ID, deep linking, and REST API integrations.
- Helped build Xfinity Call Guard from the company's shared Android framework.
- Resolved a production Firebase cost issue with a same-week hotfix.

Android Engineer

TecAce Software – Hybrid (Bellevue, WA) | July 2018 – May 2021

- Developed Android and React Native applications for Samsung using Kotlin.
- Delivered 2 flagship and 3 retail demo applications showcased on Samsung devices in Best Buy stores.
- Built an interactive S Pen drawing application using the Samsung SDK and custom canvas rendering.
- Developed media playback features and optimized widget animations.
- Adopted early Android Jetpack libraries and React Native while contributing to MVP, MVVM, and dependency injection.

Education

University of Washington — Seattle, WA

B.S. in Computer Engineering, Dec 2017
